Design A Pen

Step-1

Overview

Use case

you know
the system

you don't know
the system

① you mean design a pen, the one we use for writing on paper in our day to day life?

→ yes

Thankyou for the question. I am not fully clear over this question. Could you please provide a brief overview of the pen? so I can gather the requirement.

① you want me to design

① entity OR

② System design

of entity design → go for req. gathering

of full system design → Follow below steps

① Where can we store the data?

① In-memory OR

② Real database

② How someone can interact with the system?

① API OR

② CMD OR

③ Handcode

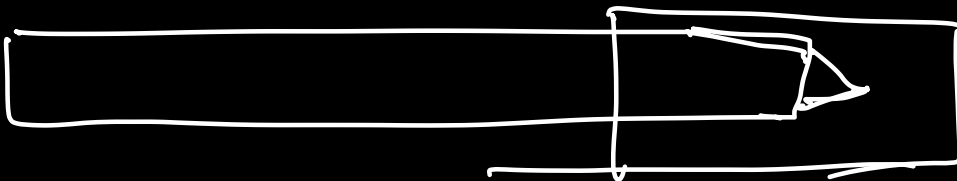

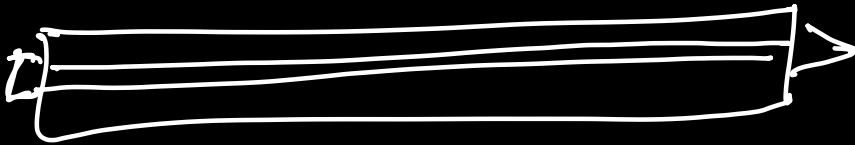

Step-2 Req. Gathering & Doubt clearing

- ① Visualization
- ② User journey.

User journey

movie → theater → time → seat → payment
↓
ticket

Visualization

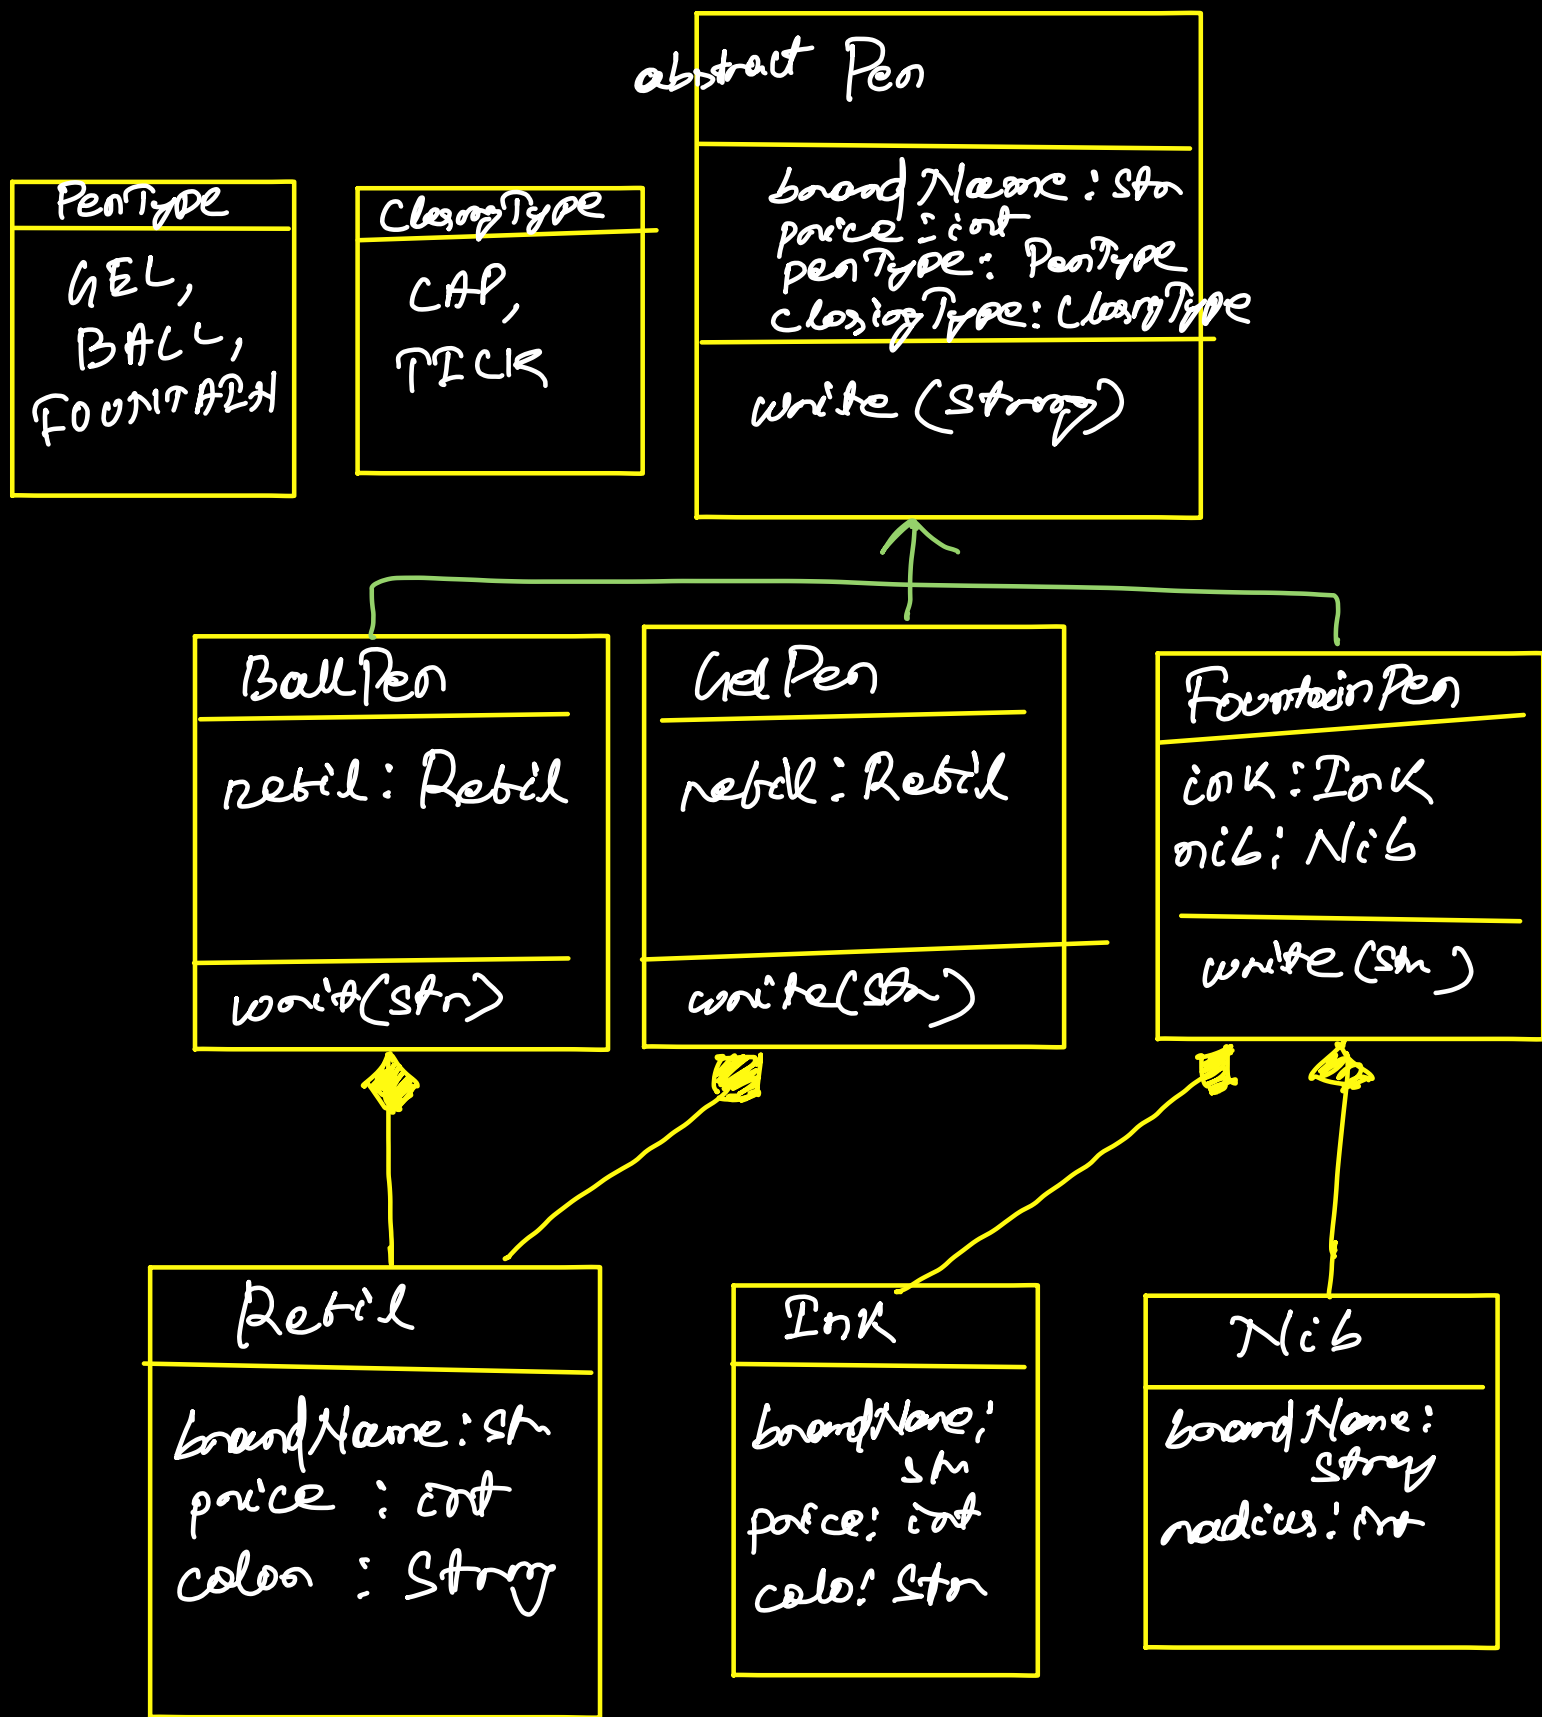

- * Suggest (5-8) core features.
- * note down each requirements.
- * Try to include a design pattern in the req.
